Work History

◆	Nov 2021 - Current	Oral and Maxillofacial Surgery Resident
		<i>Himachal Institute Of Dental Sciences, Paonta Sahib</i>
		- Completed surgery to prepare mouth for dental implants and aid in regeneration of deficient bone and gum tissues. - Collaborated with other professionals such as restorative dentists and orthodontists to plan treatments. - Removed impacted, damaged and non-restorable teeth. - Treated infections of oral cavity, salivary glands, jaws and neck.

- Informed patients of diagnosis to discuss appropriate treatment options.
- Provided emergency treatment of facial lacerations, intra-oral lacerations and fractured facial bones.
- Utilized surgical instruments to remove tumors and other abnormal growths of oral and facial regions.
- Managed busy surgical office with 2 providers, 3 staff and 100 weekly patients.
- Administered general and local anesthetics.
- Performed minor and major under guidance surgeries to resolve or reduce concerns.
- Investigated, diagnosed and treated maxillofacial issues with immunocompromised and elderly patients.

Nov 2020 - Apr 2021 Clinical Observer

Doon Hospital, Dehradun

- Pursued all opportunities for learning by attending procedures, treatments and examinations.
- Recognized and reported patient discomfort and distress to nurse or other appointed health care team members.
- Collected bodily fluid specimens to obtain necessary lab values.
- Asked insightful questions to gain deep understanding of surgical work.
- Observed patients' conditions by measuring output and vital signs, reporting significant changes to staff through chain of command.
- Collaborated with 20-person healthcare staff to promote safety during care and respond to individualized needs and activities

Oct 2019 - Oct 2020 Intern

Seema Dental College And Hospital, Rishikesh

- Maintained proper operation of dental equipment by completing regular preventive maintenance.
- Prepared treatment rooms for patients by following prescribed protocols and procedures.
- Exposed and developed radiographic studies and polished study casts.
- Wrote prescriptions for antibiotics and other medications used to treat temporary or long-term dental issues.
- Correctly administered local anesthetic and adjunctive therapies such as fluoride treatments and irrigation.
- Conducted routine oral cancer screenings.
- Recorded treatment information in patient charts.
- Examined X-rays to detect abnormalities or abnormalities in oral cavity.
- Protected patients from infectious diseases by using proper masking, gloves and safety glasses.
