PROFESSIONAL SUMMARY

Energetic and dedicated Dental Surgeon with a wealth of experience managing clinical operations and providing oversight to large dental practices. Adept in delivering high-quality dental care, with a strong clinical background and specialization in root canal treatments, periodontal plastic surgeries, and implant surgery. Proficient in utilizing state-of-the-art surgical instruments and modern techniques to ensure optimal patient outcomes.

An expert in developing and presenting personalized patient care plans, offering in-depth consultations, and ensuring seamless post-surgery follow-up services. Skilled at fostering collaborative relationships with on-site doctors, dental hygienists, and office staff, contributing to a cohesive and efficient team dynamic that enhances the overall patient experience.

Experienced in dental photography, proficient in capturing high-quality images for documentation and patient education purposes. A creative social media content creator, adept at producing and curating engaging content related to dental care, procedures, and practice promotions, thereby enhancing patient education and broadening the practice's online presence.

Passionate about staying at the forefront of dental innovations and committed to delivering exceptional care through continuous learning and professional

development. Known for a compassionate approach to patient care, effective communication skills, and a strong ability to build lasting patient relationships.

SKILLS:

- **Comprehensive Oral Health Examination:** Proficient in performing thorough examinations of teeth, gums, and surrounding tissues using advanced dental instruments, x-rays, and diagnostic tools. Skilled in evaluating dental health, identifying diseases, abnormalities, and formulating precise treatment plans tailored to individual patient needs.
- **Diagnosis and Treatment of Dental Conditions:** Expert in diagnosing and treating a wide range of dental diseases, injuries, and malformations affecting teeth, gums, and related oral structures. Provide both preventive and corrective services to improve overall oral health and restore function.
- **Patient Education and Preventive Care:** Adept at advising and instructing patients on effective preventive dental care practices. Skilled in explaining the causes, treatment options, and prevention of dental issues, helping patients make informed decisions about their oral health.
- **Root Canal and Pulp Treatment:** Experienced in treating pulp exposure through pulp capping and performing root canal therapy to remove diseased pulp and restore dental function. Use advanced techniques and equipment to ensure precision and optimal outcomes in treating root and pulp-related issues.
- **Surgical Tissue Removal:** Proficient in removing diseased tissue from the oral cavity using a variety of surgical instruments. This includes soft and hard tissue management to address oral pathologies and maintain the health and functionality of the mouth.
- **Periodontal Tooth Preservation:** Skilled in preserving periodontally compromised and mobile teeth through advanced periodontal treatments, ensuring longevity and health of teeth that may otherwise be at risk of extraction.
- **Periodontal Plastic and Aesthetic Treatments:** Expertise in periodontal plastic surgeries for recession coverage, aesthetic enhancement, and sensitivity management of teeth. Focused on improving both the function and appearance of gums and teeth through modern surgical techniques.
- **Prosthetic Dentistry and Implantology:** Proficient in restoring occlusion and function through both removable and fixed dental prostheses. Specialized in implantology, including the placement of implants and implant-supported prostheses to improve tooth function and aesthetics.
- **Pre-Prosthetic Surgery and Bone Augmentation:** Skilled in performing all types of pre-prosthetic surgeries, as well as autogenous bone augmentation procedures and guided bone regeneration surgeries. These techniques are crucial for preparing the jawbone to support implants and

ensure the success of prosthetic restorations.

- **Teeth Bleaching and Polishing:** Expertise in cosmetic dental procedures, including teeth whitening, cleaning, and polishing to restore the natural color and appearance of teeth, contributing to improved patient satisfaction and smile aesthetics.
