PROFILE SUMMARY

Skilled Dental Intern from Uttaranchal Dental and Medical Research Institute, adept in performing complex dental procedures and patient management. Demonstrated expertise in diagnosis, treatment planning, and dental technology use. Excelled in patient care through effective collaboration and education on oral hygiene, showcasing strong interpersonal and technical skills.

EDUCATION

BDS - 2019-2024
Uttaranchal Dental And Medical
Research Institute Dehradun

WORK EXPERIENCE

- October 2023 - October 2024
- I have successfully completed a one-year rotary internship at Uttaranchal Dental and Medical Research Dehradun
- Performed patient examinations, root canal treatment, preventive, restorative, and minor surgical procedures under the guidance of experienced practitioners.
- Assisted in diagnosis, treatment planning, and patient management, gaining hands-on experience with a wide range of cases.
- Educated patients on oral hygiene practices, preventative dental care, and post-treatment guidelines.
- Gained experience in dental radiography, sterilization protocols, and infection control standards.
- Effectively collaborated with a multidisciplinary team to deliver high-quality patient care.

ACTIVITIES AND HONORS

- conducted research on the topic of dental flossing and brushing.
- field visits in rural and urban areas.

ACCOMPLISHMENTS

- consistently achieved excellent marks throughout my dental education, demonstrating a strong understanding of both theoretical and practical aspects of dentistry. My academic performance reflects a dedication to mastering key concepts and a commitment to excellence in the field.
- participated in various CDE program
- earned a distinction in Periodontology.

SKILLS

- Dental Procedures: Proficiency in basic and complex procedures, including fillings, extractions, root canals and crowns.
- Diagnosis and Treatment Planning: Ability to diagnose dental issues accurately and develop effective treatment plans.
- Use of Dental Tools and Technology: Skilled in using hand tools, x-ray machines, and the latest dental technology for efficient treatment.
- Anesthesia and Pain Management: Knowledgeable in administering local anesthesia and ensuring patient comfort during procedures.
